FOREWORD

Charting The Way Ahead In The Covid-19 Era

n this strange, unprecedented time, the only way to develop is to move ahead. Lockdowns have taught us to look at the positives of stagnancy and reflection, but planning how to achieve a new normal is what will keep us on the path to progress – both as individuals in our lives and as working employees of the organizations we represent.

As we prepare for the transition from home to office, we need to respond effectively to the post-Covid-19 environment. As employers, we will take all possible positive steps to maintain the safety and well-being of our workforce.

To successfully execute these plans, the constant support and cooperation of employees is crucial. We are very grateful for the continued backing we have received from our personnel through the working from home platform and are confident that this will continue as we make the return to the physical office.

One thing is certain. We are entering a new world of work and it is crucial to be well prepared for this new reality. The emphasis must be on creating a safe environment where employees can be productive and make an impact.²⁷

> PAUL DUPUIS Managing Director & CEO Randstad India

It is imperative to return to work with the necessary precautions. The safety protocols we put together will highlight the elimination and substitution of various workplace policies in order to adapt to the new reality of a physically distant work environment, ensuring that employee safety and risk mitigation are of the utmost priority."

MARCO VALSECCHI

Country Manager & Managing Director The Adecco Group, India

"

This is our opportunity to restart the economy to create a future of work that works for everyone, one we know people have been seeking for some time. More digital, more virtual, more connected and more wellbeingoriented than we could ever have imagined.³⁷

"

Companies and in particular HR service organisations like the ones in this initiative should play an active role to ensure India is getting back to work safely. We should treat this COVID-19 crisis as a defining moment for ourselves, our organisations and our country."

SANDEEP GULATI

Managing Director ManpowerGroup India MARCOS SEGADOR ARREBOLA Managing Director Gi Group India

Why This **Report Is Important**

he India Alliance initiative is a group comprising Randstad India, The Adecco Group India, Manpower Group India and GI Group India, that has come together to put together the best practices from some of the best known organisations in India and share the knowledge with employer organisations around the country.

THE OBJECTIVE OF THIS ALLIANCE:

- It is expected that Covid-19 will remain 'with us' for some time to come until we control the disease with a cure. a vaccine.
- In the meantime, we need to adjust to a new reality. Securing our workplaces, securing a healthy and safe working environment. Protecting workers.
- To limit the economic downturn and impact on people's ability to earn a living, the labour market and all its stakeholders must quickly adjust to a new reality and a new world of work.
- Companies must have clear processes and protocols. Given the sense of urgency, the alliance is on a mission to make a vital contribution to this process of preparing for the new normal and helping India get back to work safely.
- What is clear is that unparalleled collaboration and coordination by diverse stakeholder groups, ranging from employers and governments to labour unions and institutes, is needed for this to succeed.
- This is a call to action to every organization and association in the country by the alliance to come and join this initiative. Why? Because the Alliance's research can have the greatest impact if the best practices it has

identified are widely and rapidly shared across companies and industries.

The result of work this past few months is a comprehensive report on 'Help India Get Back To Work Safely'. Policymakers, sectors, organizations, and businesses can use this report in their processes to get up and running in a safe, healthy, and effective way, as soon as the local laws allow.

HERE'S AN OVERVIEW OF WHAT YOU CAN FIND IN THIS REPORT.

- **SECTION 1** Gives the context and objectives of this report
- **SECTION 2** Provides the framework and the approach to getting safely back to work with an example of the journey to implement a 'Safely Back to Work' action plan
- **SECTION 3** - Shows illustrative examples of Safe and Next Work Solutions
- **SECTION 4** Details out safeguard measures that companies are implementing to get back to work safely
 - Covers 7 major sectors
 - Manufacturing
 - IT / ITES
 - Pharmaceuticals and Life Sciences
 - Infrastructure

- **Business Services and Consulting**
- Retail
- Ecommerce
- **SECTION 5** - Summarizes the highlights of measures in the context of hierarchy of controls viz., Personal Protection Equipment (PPE), Administrative Controls, Engineering Controls, Substitution and Elimination
- **SECTION 6** - Provides samples of posters that organisations can use to create awareness about how to manage the risks in the workplace

The India Alliance hopes that the safeguard measures in this document will boost the confidence of organizations to speed their process of getting back to work safely and in the process, help millions of workers get back to their livelihood.

INDUSTRY EXAMPLES OF PRACTICE

OVERVIEW OF MEASURES

Bringing Our Employees Back To Work Safely

he work-from-home model has been the strongest force to reckon with throughout the COVID-19 challenge and continues to remain so. It has sustained organizations, and enabled them to decentralize their workforce in a manner that best suits the company's objectives and goals. At a time when both production and consumption of goods and services has taken a severe beating, this has been the one light at the end of an especially dark tunnel. While we are grateful for this, a return to the physical office is an inevitability in the face of economic turmoil and job retention. It needs very thoughtful planning and execution. There are several safety protocols to be kept in mind that require keen employee intervention and participation.

A GRADUAL **RETURN TO WORK FROM OFFICE**

Branch by branch, office by office, or even department by department.

STAGGERED EMPLOYEE RETURN

Creation of social bubbles enabling certain small groups of people to interact with each other on a regular basis, at least for the foreseeable future. As things gradually improve, the number of employees contained in these bubbles can go up if needed.

EMPLOYEE DISCRETION Based on factors such as the presence of underlying health issues that could prove an imminent danger to their wellbeing or even the mode of transport required to travel to work from home, as the risk of transmission is higher in a crowded or enclosed space.

NECESSITY FOR

COVID-19 Health & Safety Protocols

As employers, our aim is to provide a risk-free environment for our personnel so that they can perform their duties and fulfil their responsibilities without additional mental stress. This will be based on the MHA guidelines and workplace protocols to maintain employee health and safety in COVID-19 times.

> SOCIAL DISTANCING Distancing from your peers at all times. throughout the day, as per MHA guidelines.

LIFTS & **STAIRWAYS**

Not more than 4 people in a lift at any time. Encourage the use of stairs over lifts.

HAND

SANITIZE

SANITISERS

placed at frequent

spots throughout

the premises.

Sanitisers to be

STAGGERED TIMINGS

Staggered entry-exit times and lunch breaks for all employees to reduce interaction and overcrowding.

GROUP OF 5

Not more than 5 people will be allowed to convene together at all times.

REGULAR DISINFECTION

Daily disinfection of all rooms and departments, equipment and surfaces as per recommendations.

AGE & HEALTH FACTOR

Employees over 65, those with underlying health issues, and those with kids aged 5 and under, are encouraged to continue WFH until further government guidance.

TEMPERATURE CHECKS

Daily temperature checks for employees to be conducted at screening counters, before entering the premises.

NON-ESSENTIAL VISITORS

Friends and family of employees to not be encouraged for on-site visits in the immediate future.

COVID-19 **INFORMATION**

Possible symptoms and prescribed treatments, hospitals and clinics providing COVID-19 medical care, helpline numbers and addresses of organisations to be furnished throughout the premises.

- Domestic workers
- Social care workers
- Drivers
- Delivery service providers
- Home repair technicians
- Any worker who has to provide services in the homes of people with COVID-19

Source: Excerpts from "Guidance on Returning to Work" by OSHA.gov

When is working from home (WFH) mandatory for employees?

If the employee's place of residence is located in an area or district where the State has declared a lockdown of all non-essential activities, the employee must work remotely instead.

What are the travel restrictions to be kept in I mind as far as work and personal travel is concerned?

The government has advised against any non-essential travel and employers must work around this. If an employee has to travel for an unavoidable personal reason, the employer cannot stop them. They must follow the 14-day guarantine at home rule once they return, and test negative for the Covid-19 infection. They may be asked to furnish a medical document clarifying the same before resuming work. This also holds true for employees with family members who have travelled to Covid-19 affected areas.

Can the employer conduct compulsory medical tests for their employees?

No tests can be conducted without the consent of the employee. Any 'sensitive personal information' and confidential data must be maintained at all times and the company must have a privacy policy.

Can the employer conduct compulsory temperature screenings for employees?

Yes, the employer may do, but here again, all confidential and personal health information regarding the employee must be kept private.

If an employee gets infected, is the employer obliged to cover medical expenses? This depends on how the employee contracted the virus - if it happened through a work-related commitment such as a meeting or travel or through a personal obligation.

If an employee gets infected, can the employer reveal details about the same to the rest of their personnel?

The employer cannot reveal any names but must inform their workforce that an employee has been diagnosed with the virus. All those in contact with the said employee should especially be made aware of this and asked to isolate if need be.

Are all employees expected to wear protective gear or equipment at the workplace? While there is no such legality imposing this, employers may ask

their employees to take the basic precautions to safeguard the health of their employees.

Can the employer stop their employees from wearing protective gear like a mask or a respirator?

No, the employer cannot do so. They may ask the employee if they are displaying symptoms though.

How can the employer prevent the harassment of any employee, suspected of being infected?

It is the duty of the employer to protect their employee from any kind of harassment. Again here, all health information of any suspected employee should only be shared on a need-to-know basis.

How can the employer educate their workforce about the virus?

The employer can use a variety of print and electronic media to further educate their personnel, but rather than share their own programs, they must disseminate the information put forth by the State. Any updates must also be duly shared.

SAFELY BACK TO WORK

CONTEXT & OBJECTIVES

OVERVIEW OF MEASURES

INDUSTRY EXAMPLES OF PRACTICE

EXAMPLES OF SAFE & NEXT WORK SOLUTIONS

Approach for getting Safely Back to Work

Co-assess current work environment regarding back-to- work-readiness	2 Setting the course for a tailored path back to work	3 Develop concepts / solutions	Develop roadmap for the path back to safe work	5 Implement solutions
IDENTIFICATION OF WORKPLACE NEEDS &	OPTIONAL: Fast lane, focussing on em	ployee adoption of existing ideas	SUCCESSFUL ADOPTION	
 OPPORTUNITIES (OPERATIONAL & CULTURAL), THROUGH benchmarking your situation today against scientifically established MVPs of safely coming back to work (spacing, virus protection, etc.) researching needs & attitudes regarding adoption of workplace safety measures with relevant 	 A: Accelerator module – quick win path You already consider implementing concrete back- to-work-initiatives? We help you getting what you already have onto the road at the speed of light 	 Take existing initiatives/MVPs into a rapid test- & learnloop Alignment with key stakeholders and testing with key target audiences 	 Co-create transition journey A set of workable agreements and rules of conduct, that put the safety and needs of everyone first 	 Facilitate adoption of transition journey Collaborate with internal stakeholders to ensure the successful adoption of necessary behavioural shifts at the workplace
stakeholders	B: Build & Test Module –	 Co-create prototypes (Sprint-/agile-based "Develop, test, & iterate" - setup) 	SAFE OPERATIONS	
PRIORITIZATION OF INITIATIVES	 holistic development path You know you need to safely get back to work, but don't 	 Alignment with key stakeholders and testing with key target audiences 	Define prioritized concept launch-plan	Operational implementation of initiatives/ideas
Quick winsVSMoon shots"the path"sustainingback to workthe journey"tomorrow"	 get back to work, but don't exactly know how? We help with an agile end-to-end process to co-create concrete tailored initiatives 	OPTIONAL: Model the impact of solutions using advanced analytics	 A toolbox of concepts (incl. backlog) for an adapted and fully equipped workplace at which employees can work safely and thrive, again 	 Collaborate with internal stakeholders to realize the successful implementation of the prioritized "safely-back-to-work"- solutions at the workplace
EXAMPLE TOOLS				
Back-to-work-readiness scorecard: review of floor plan, PPE guidance, policies and training methods	Setting- the-Course- Workshop	IdeationPrototyping Testing Iteration (KPIs x Impact)	Adaption of toolbox (transformation co-creation kit) Back-to-work transition journey Back-to-work implementation roadmap	Collision Workshop: Agenda-set ownership for implementation & responsibilities Operations implementation sprint

Ongoing support / check-ins

Adoption success-reflection

- What works/doesn't work on a behavioural adoption-level?
- IF NEEDED: iterate & establish course-corrections

Sustaining the adoption journey

 Organisational change-coach advises on implementation adoption aspects of sustaining the journey

Implementation success-reflection

- What works/doesn't work on an idea/initiative-level?
- IF NEEDED: iterate & establish course-corrections

Sustaining the implementation journey

 Implementation-coach advises on operational aspects of sustaining the journey

Safe workplace dashboard/ control room & reflection — weekly with key stakeholders

Employee and stakeholder evaluative survey

Follow-up and coaching session

Example of the journey to implement a "Safely Back to Work" Action plan

ILLUSTRATIVE EXAMPLE

LOCKDOWN / **REMOTE PERIOD**

 Planning transition period, prototyping temporary and permanent measures to implement

TRANSITION PERIOD

- Monitoring impact of implemented measures, evaluating, refining and tweaking, where needed
- Monitoring overall COVID-19 development, being ready to scale up and down measures, as needed

PLANNING AND SET UP FOR RETURN

- Gradually scaling back all temporary measures
- Maintaining strategy to guickly implement temporary measures in case of new emergency/virus outbreak

SUCCESSFUL ADOPTION

WORKER BEHAVIOUR AND POLICIES

- Visual Social-Distancing/ Sanitization Cues
- Highly Visible Workspace Cleaning
- **Designated Team Guard**
- **Staggered Shifts and Lunch Times**
- **Canteen Tables Spaced and Food** Served Portioned in Re-usable, **Disposable Boxes**

RETURN TO WORK TRAINING

- Communication plan to reach and reassure employees
- Web conferences (pre-return)
- Online Trainings (pre and post return)

HELP INDIA GET BACK TO WORK SAFELY

Best Practices Handbook

EXAMPLES OF SAFE & NEXT WORK SOLUTIONS

CONTEXT & OBJECTIVES

SAFELY BACK TO WORK

INDUSTRY EXAMPLES OF PRACTICE

OVERVIEW OF MEASURES

Re-modeling/Re-tooling of the workplace

Ensuring optimal spacing between employees/ functions/cubicles

ILLUSTRATIVE

+

Local governmental rules and decisions should always be followed carefully

CONCEPT DESCRIPTION

Lines, offices and cubicles could be redesigned or re-tooled to provide for greater spacing between employees and reduce the risk of contamination between functions.

IMPACT

+

- This may help reduce the spread of any infection
- May also provide compartmentalisation of the organisation in the event of a wider spread, allowing the maintenance of some company functions

Improved Air Filtration & Ventilation

More efficient removal of hazardous particles from the environment

P

ILLUSTRATIVE

Local governmental rules and decisions should always be followed carefully

CONCEPT DESCRIPTION

Workplace ventilation and filtration could be improved to reduce any hazardous particles which may be airborne.

IMPACT

Reduces the concentration of airborne viral or bacterial particles which may help reduce the likelihood of worker infection

More Touch-free Handles/Interfaces

Limited handles and physical interfaces and introduce motion control

KEYBOARD

CONCEPT DESCRIPTION

Greater use of motion-control or touchless doors and interfaces throughout the workspace.

IMPACT

- It can reduce the risk of workers contacting a contaminated surface
- Could help reduce cleaning requirements

Source/Supporting Rationale: OSHA - "Guidance on Preparing Workplaces for COVID-19"

Visual Social-distancing/Sanitization Cues

Providing quick checks/reminders to maintain distancing and hygiene

ILLUSTRATIVE

CONCEPT DESCRIPTION

Visual cues such as markings or projections on the floors, walls and interfaces could indicate to workers of safe distances and provide reminders as to when they should change PPE (E.g., paper tissues could be provided to press photocopier buttons) or wash their hands as they go through the working environment.

- May increase the frequency with which employees wash their hands
- Increases employee awareness about hygiene

Staggered Shifts and Lunch Times

DAILY TEAM WORK

SCHEDULE

GROUP 2

GROUP 3

GROUP 1

Employee shifts and breaks can be staggered to prevent queues and crowds

ILLUSTRATIVE

+

Local governmental rules and decisions should always be followed carefully

CONCEPT DESCRIPTION

Easy and clear instruction about work shifts and breaks could be provided (e.g., where employees should sit and for how long they can be in the breakroom/canteen).

- Can help reduce queues and crowds, especially relevant if screening measures are introduced requiring more time to pass through
- Could make it easier for workers to maintain social distance

Canteen Tables Spaced and Food Served Portioned in **Re-usable / Disposable Boxes**

CANTEEN TABLES SPACED

Serving pre-packed food in re-usable boxes

CONCEPT DESCRIPTION

Replace self-service style lunches from canteen with catered, portioned food in re-usable / disposable boxes. This could take the form of food trucks during summer months to get the workforce out into fresh air.

Canteen tables could ensure spacing between employees so no-one sits directly beside or in front of the worker (via checker-board arrangement). Strict cleaning procedures need to be in place.

IMPACT

May help reduce queues and physical contact between workers

Hygiene Zones with Checkpoints

Workspace separated into zones with mandatory sanitization between each zone

CONCEPT DESCRIPTION

The workplace could be separated into various zones with mandatory sanitization and recording of who is moving between zones.

IMPACT

- Increases the frequency with which workers must wash hands/ change PPE
- Provides an indicator of which zones are most at risk of infection and enables contact tracing

Source/Supporting Rationale: American Centre for Disease Control – "Implementation of Mitigation Strategies for Communities with Local COVID-19 Transmission"

Highly Visible Workspace Cleaning

Confirmation of cleaning is displayed confirming cleanliness of workspace

ILLUSTRATIVE

Local governmental rules and decisions should always be followed carefully

CONCEPT DESCRIPTION

Cleaners should update a 'housecleaning checklist' and display in a highly prominent location upon completion of cleaning.

IMPACT

Instils confidence in workers that the workspace is clean and well maintained

Hotspot Surfaces Marked with Colour

Frequently contacted surfaces highlighted and prioritized for cleaning

ILLUSTRATIVE

Local governmental rules and decisions should always be followed carefully

CONCEPT DESCRIPTION

Surfaces that workers are frequently in contact with could be brightly colourcoded as a reminder to cleaning staff to ensure they are effectively sterilized and a visual cue to workers to wash hands or change PPE.

- Increases employee awareness of surface contact and hygiene
- Provides greater direction to cleaning staff

Clean Working Kits

A personal kit of cleaning essentials i.e. alcogel, wipes etc., to every employee

CONCEPT DESCRIPTION

Each employee could be issued with a personal "Clean Working Kit" which would include items such as alcogel, sanitary wipes and PPE disposal bags.

IMPACT

This could ensure that each employee has the tools they need to maintain good personal and workplace hygiene

Designated Team Guard

A team member who ensures new standards are being followed

ILLUSTRATIVE

Local governmental rules and decisions should always be followed carefully

CONCEPT DESCRIPTION

To ensure any new hygiene standards are maintained and to provide workers with a voice in maintaining these standards, a Team Guard could be appointed.

IMPACT

This Team Guard would be responsible for ensuring their teams have what they need in terms of knowledge and equipment to maintain personal and workplace hygiene

Printed Media Campaign

An information and learning campaign comprising printed info-packs

ILLUSTRATIVE

CONCEPT DESCRIPTION

Leveraging printed media to inform employees about the changes they can expect when returning to work.

- Can increase transparency and give clarity about current situation and the way it is being is handled
- Could increase mental and emotional preparedness of staff upon return to work

Web Conferences (Pre-Return)

A series of web conferences to keep workers informed about the process

ILLUSTRATIVE

CONCEPT DESCRIPTION

Gathering employee groups to video conferences where they can get the latest information from their employer. Allowing questions and concerns to be raised prior or during call.

- Helps keep everyone up to date
- Can enforce transparency and trust within organisation

Online Trainings (Pre and Post-Return)

Online learning courses providing latest info to prepare workers for return ...

ILLUSTRATIVE

CONCEPT DESCRIPTION

These online training sessions may form a part of a larger series preparing the worker to return to the site. Beginning in their home and continuing for a time after return.

- Can be deployed within the workers home (pre-return) or on-site (post-return)
- Can be tailored to match workers' preferred learning style
- Can be gamified to provide learning incentives
- Can provide continuity across the pre and post-return horizons

Large Format Visual Displays in Workplace

Prominent displays highlighting new processes, policies, tools and layouts

ILLUSTRATIVE

Local governmental rules and decisions should always be followed carefully

CONCEPT DESCRIPTION

Large format posters or digital displays providing prominent, frequent reminders to employees of the new workplace situation and (crucially) the rationale behind it.

- Large format should make the messaging "unmissable"
- Simple messaging can be delivered in an highly accessible way
- Can be deployed standalone or part of a wider messaging strategy

INDUSTRY EXAMPLES OF PRACTICE

CONTEXT & OBJECTIVES

SAFELY BACK TO WORK

OVERVIEW OF MEASURES

EXAMPLES OF SAFE & NEXT WORK SOLUTIONS

Safeguarding measures - overview

The safeguarding measures given here are broadly applicable to working environment in Manufacturing companies

Corporate campuses

Offices in commercial complex

Manufacturing plants

Local government rules and decisions should always be followed carefully

THEME

WORKFORCE PROTECTION

MEASURE CLASS	MEASURES		
Travel / movement to work (including work from home measure)	 Employees should avoid using public transport for p It is recommended that keeping personal safety in m Employees bringing cars to declare beforehand to th The vehicle windows to be kept open while in travel. 	nind, until further notice, employees should use their own vehi neir respective HR department	cle for commuting to office
Entry to worksite	 Thermal screening will be carried out at the reception and a self-declaration form may be given for employees to fill out. Employees may be allowed in after completing the formalities. 	 Each employee has to sanitize their hands with every entry Use of respirators is mandatory for plant entry and working in other areas 	 Everyone will be sca entering the office. T as fever, cough, or s entry
<section-header></section-header>	 All vehicle users are advised to sanitize their vehicles on daily basis and also to educate their drivers on social distancing and personal hygiene All the machinery entering the premises will be mandatorily disinfected by spray Entry of non-essential visitors not to be permitted at the sites Following persons will be encouraged to work from home Persons above 50 years of age Persons with co-morbidities Parents of children below the age of 5 Pregnant women Mandate frequent cleaning of common surfaces and hand washing for employees Employees are urged to regularly and thoroughly clean their hands with an alcohol-based hand rub or wash them with soap and water All employees entering the plant shall be monitored for temperature by the security via 	 thermal screening High contact surfaces such as switch, buttons, handrails / handles and call buttons, intercom systems, equipment like telephone, printers/ scanners, and other office machines should be cleaned twice daily by mopping with approved sanitizer. Only trained staff should be deployed for cleaning of washroom and toilets The security will check body temperature of each employee. If body temperature is more than 37.5°C, the employee will get directed to medical center. The security will keep in record, copy of travel passes of employees, if any, at security gate. To maintain sufficient stocks of hand sanitizer, soap and PPE. All the garbage shall be cleared off and the area / bins disinfected. All the tools shall be safely secured. 	 Deployment of work of congested work I Any employee havin stay at home and we symptom free and g

fice as far as possible.

scanned for temperature before ce. Those showing symptoms such or sneezing will not be allowed

vorkmen to be staggered in case ork locations

aving cough, cold or a fever, must d work from home till they become d get a medical certificate Everyone will be scanned for temperature before entering the office

THEME EMPLOYEE PROTECTION

MEASURE CLASS	MEASURES		
Personal Protective Equipment	 Everyone should wear the mask at all times during work. Employees should wear their mask in the vehicle to ensure respiratory hygiene Employees should not touch Access Card points while marking attendance 	 Appropriate PPE like Face covers, Masks, Goggles, Gloves, Coats / Aprons, Shoes and appropriate disinfecting gadgets like sprayer, brush, etc. shall be made available Janitorial staff should be trained properly for use and disposal of PPE's 	 All those involved i transportation serv sanitation activities site, offices and all shall use PPE like I Goggles, Full body applicable.
Workplace distancing and workstation barriers	 A 6-feet / 2-meter distance should be followed at all times between individuals Physical distance of 1 metre should be mainained while standing in a queue to collect/order food/ tea/coffee etc at the counter Whenever possible, bring your food from home. 	 Say no to face-to-face meetings. However, if a face-to-face meeting is inevitable, it is critical to maintain a 6-feet distancing norm. Use of staircase for climbing should be encouraged Seating arrangement shall be such that each 	person is at-least 6 sites and in gather sessions. • New seating arrang the social distancir
Sanitization measures	 Entire office premises should have at least one round of pesticide control activity before resuming the office Employees should always carry an alcohol-based hand sanitizer and gloves with them Housekeeping will continue to clean the door knobs and commonly used spaces at regular intervals. The surfaces (e.g. desks and tables) and objects (e.g. telephones, keyboards) should be wiped with disinfectant regularly. Employees should sanitize their hands before and after meal All buses shall be disinfected completely prior and at regular intervals. Signage should be displayed, 	 where feasible, to identify time of last cleaning cycle The employee will enter the vehicle only after sanitisation. Initiate regular sanitisation for employees at the shopfloor The shop floor and work area will get sanitized regularly. All areas in the premises will be disinfected using user friendly disinfectant medium At the entry use hand sanitizer for cleaning of hand or hand washing facility. For metallic surfaces like door handles, security locks, keys etc. 70% alcohol shall be used to wipe down surfaces where the use of bleach is not 	suitable. • Entry of suppliers I Basket, etc are to k to be done at town collection points

ed in security services, ervices, facility management , ties etc. of floor area, garden area, all other areas cleaning activities ke Face covers/shields, Masks, ody covers, Gloves, Shoes etc. as

t 6 feet apart from others, on job erings, meetings and training

angement to be initiated keeping cing norms Everyone should wear the mask at all times during work

ers like Amazon, Flipkart, Big to be avoided and collection is ownship main gate at designated ts

THEME EMPLOYEE PROTECTION

MEASURE CLASS	MEASURES	
Worksite facility conditions	 Touchless water taps and soap dispensers to be installed in the washrooms and employees should avoid touching surfaces in the washroom as much as possible. External parcel shall be sanitized by the dispatch section. Internal file movement may be done after 	 sanitization of hands. For air purification, it is advisable to install an AHU based air purifier filter system at the roof to improve the air quality inside the office. In phases, water supply to all wash basins will be replaced by foot operated taps for all common /

as of premises

nsor based / touchless faucets and sed urinal flush valves in the washrooms

o other's belongings, sharing common printers and or other work tools/ should be minimal. Always carry an alcohol-based hand sanitizer with you and gloves with you

THEME

BUSINESS PROCESS ADAPTATIONS

MEASURE CLASS	MEASURES	
Physical workspace adaptations	 One should sit in the seat allotted by the Admin team. No swapping allo Employees are encouraged to take the stairs. However, if they must use 	
Digital workspace adaptations (including work from home measures)	 Stick to soft copies. Avoid document exchange. 	
Operational and productivity process adaptations	 from it being a good process, it also helps to recognise the person behind the mask Self Declaration form will be collected from all the employees before the resumption of operations Special transportation facility to be arranged for those employees who require transport Outstation travel to be allowed only with approval from the highest authority If the employee is commuting on a 2 wheeler, there should be no pillion rider, and if using a car, only 2 people are allowed i.e driver in the front seat and the other person in the rear seat (diagonally opposite). While in the field, before/after meeting employees/ vendors/dealers /retailers/stake holders the employee should sanitize themselves. Goodwill gestures such as tea/coffee/snacks should be avoided. Bar visitors if possible. However, if visitor entry cannot be completely barred, have a stringent Sticker indication streament in the front seat areas for ensure sant. Lunch breament is the stringent in the stringent	 uantities of hand wash and sanitizer with touch free mechanism) to be all entry and exit points and common nployees to disinfect themselves a one-hour gap between shifts to tization and social distancing k should be staggered for employees ches, to ensure social distancing in

f people in groups

y hospitals / clinics authorized to patients to be available at work s.

D card as mandatory. Biometric sabled.

conducted through video avoid physical interaction

re located in a building shared banies, it is important to reach an cerning communal areas such as and restrooms.

ion of the factories, sites and pening. Disinfection should be y (wherever feasible) during the once a day from the second week

The employees are to be rostered in staggered shifts/staggered start and end time, wherever possible (e.g.: provide relaxation of up to 1 hour while coming to the factory/office and accordingly stagger the exit time from the factory/ office). Ensure deep cleaning between shifts, avoid crowding in a factory/office/site as applicable One-hour gap between shifts will be provided to ensure social distancing

nds or hug friends and colleagues n soap frequently door handles / knobs

Safeguarding measures - overview

The safeguarding measures given here are broadly applicable to working environment in Information Technology and IT Enabled Services companies.

- Corporate campuses
- Standalone offices
- Offices in commercial complex
- Tech Parks

Local government rules and decisions should always be followed carefully

THEME WORKFORCE PROTECTION

MEASURE CLASS	MEASURES
Travel / movement to work (including work from home measure)	 Employees are advised to avoid the use of public transport and use their own vehicles to commute to office as far as possible. If travelling by cab or carpool, not more than three people should be in the car. Sanitize your hands after alighting from the bus or train or cab (if using public transport) and before entering the office Drivers shall maintain social distancing and shall follow the required dos and don'ts related to COVID-19. It shall be ensured by the service providers/officers/staff that drivers residing in containment zones shall not be allowed to drive vehicles When driving your car to the office, follow the "On-road Activities" protocol, i.e. while paying tolls, stopping to refuel, etc. This is a good time to consider alternative transportation options: Bicycle/motorcycle; Walking part of the trip; Company shuttle etc. Provide safe and accurate instructions to all employees and collaborators to ensure the correct use of public transport in case they have no other option but to use it Arrange private transportation back home for those who are ill or suspected to be ill, with seating alone at the back seat, while ensuring that both the driver and the passenger are Wearing a massible to the driver and the passenger are
Entry to worksite	 A compulsory screening will be carried out for all staff/visitors before the turnstiles with a thermal scanner Any person found with fever/cough and/or with breathing difficulties will not be allowed and the respective HOD will be informed immediately All Housekeeping, Security, Electrical maintenance team (including building maintenance in the basements and around the building) will go through temperature checks before entering office area (inside or outside) twice a day Plan for how and when employees will return to work or to the worksite to create an organized and controlled approach. All employees returning on the same day at the same time could be overwhelming and possibly unsafe. Isolate area for visitors and bulk gatherings especially walk-in interviews etc, as a preventive measure Assess and plan the implementation of screening measures and reduce entrance points. Train relevant employees e.g. security, medical staff/ HR, and/or receptionist on the screening process. All employees will be permitted into the office area only if they have a mask to cover their face and nose. Employees will have to wear their mask at all times during their office hours as well as during the commute to and from the office.

nasks. The back seat area should after every use.

- operate at 40% of capacity
- rivate cars If allowed by the State one driver and two passengers in ment zones.
- f coming from the Red Zone. Rider rider, if coming from Orange and
- nask is mandatory while commuting , car pool or 2-wheeler

Sanitize your hands after alighting from bus or train or cab if using public transport.

THEME WORKFORCE PROTECTION

MEASURE CLASS	MEASURES	
Employee health policy measures	 Prior to undertaking cleaning, all Housekeeping personnel need to use proper Personal Protective Equipment (PPE) like Surgical Hand gloves, Disposable Face mask (3Ply) and goggles where applicable. A separate set of cleaning equipment will be used for work station area and Wash room and Pantry/ collaboration areas such as Mops, Chemical trays, Clothes etc. Employees who fail to comply with measures implemented by the management may face both internal disciplinary actions and also prosecution by the local authorities in accordance with local law. Non-Contact alcohol based hand sanitizer dispensers to be made available at the lift areas, reception and near other high contact surfaces for frequent use and replenished periodically. Advise all employees who are at higher risk i.e. older employees, pregnant employees and employees who have underlying medical conditions, to take extra precautions. They should preferably not be exposed to any frontline work requiring direct contact with the public. Office management to facilitate work from home wherever feasible. If and as permitted by local personal data privacy laws, have a list of employees that classify as vulnerable health groups. Channel them to HR for appropriate treatment, which may include exclusive entrance, different 	<text></text>

Advise all employees who are at higher risk i.e. older employees, pregnant employees and employees who have underlying medical conditions, to take extra precautions

THEME EMPLOYEE PROTECTION

MEASURE CLASS	MEASURES
Personal Protective Equipment	 Ensure receptionists, security, and persons executing screening are wearing COVID- PPE. Install protective equipment (acrylic or glass pane markings), as needed. Reception staff / Office staff to wear masks and hand gloves and take other required precautionary measures After use, workers should properly dispose of or sanitize COVID-PPE (such as gloves, face masks, goggles or a face shield, and gowns) in a authorities or local regulatory requirements
Workplace distancing and workstation barriers	 Each department can decide on staggered shifts to avoid crowding. Disinfection procedures for all work areas to be carried out between two shifts. Employees are encouraged to get their own food while at work. Meal boxes to be provided by company to employees who are not able to get their own food. Employees should be encouraged to eat at their respective workstations and to maintain hygiene at their workstations while they eat. Specific markings may be made with sufficient distance to manage the queue and ensure social distancing in the premises. Adequate crowd and queue management to be ensure social distancing norms. Mhen meeting customers or third parties, remote meeting methods should be preferred. If facetor-face interaction is necessary, follow safety protocols with regard to PPEs, social distancing, respiratory etiquette etc., If necessary, reconfigure furniture and/or reception area layout at entrance to ensure safe physical distancing, e.g., place floor stance markings, physical barriers, acrylic or glass panels, open
Sanitization measures	 All areas in the premises (for example, entrance to office and reception areas, meeting and training rooms, work areas, washrooms, toilets, sinks, cafeteria, lifts etc) should be disinfected completely using user-friendly disinfectant mediums, as per the guidelines issued by the Ministry of Health and Family Welfare of Government of India. Doors should be kept open for safe and touch free access Capture attendance through touch-free measures like for example, the RFID card Employees are advised to carry a bottle of hand sanitizer with them all the time Ensure regular supply of hand sanitisers, soap and running water in the washrooms. Required precautions while handling supplies, inventories and goods in the office shall be ensured. Sanitize common touch points and surfaces regularly in the building like elevator buttons, door handles, stair case rails & other common areas like reception, cafeteria, restrooms/conveniences Communicate with all other tenants in the building/ IT Park on the measures taken by them to sanitize Perform comprehensive cleaning and full sanitization of the workplace. If possible, ventilate

THEME EMPLOYEE PROTECTION

MEASURE CLASS	MEASURES
Worksite facility conditions	 Encourage the use of the staircase Company team lunches / dinners outside office are discouraged. If a client/vendor does turn up at the office, they should be met in the designated meeting room and not be allowed access to the rest of the office Common workout areas and gym facilities to be suspended until further notice Segment the elevator into 9 squares, 6 squares or 4 squares depending on the size of the elevator to limit the number of people allowed to enter at one time For air-conditioning/ventilation, the guidelines of CPWD shall be followed which emphasises that the temperature setting of all air conditioning devices should be in the range of 24-30°C, relative humidity should be as much as possible and cross ventilation should be adequate Keep doors open throughout the office, to avoid touching door handles. As an alternative, install floor door handles to open doors with foot. Establish an isolation room near reception Inspect HVAC systems, filters (Merv upper rating), and fire systems. Allow inactive equipment to fires har should be zequipment to for a proper time period (e.g. water piping). Have a trash can with lid for COVID-PPE (COVID- related Personal Protective Equipment) disposal at every entrance, sanitizing areas at different locations, and increase antibacterial gel distribution.

All employees will be encouraged to use the staircase

THEME

BUSINESS PROCESS ADAPTATIONS

MEASURE CLASS	MEASURES		
Physical workspace adaptations	 Reduce the usage of elevators. Have proper floor-stance signs. Eliminate or cancel seats to visibly reduce density, prefer diagonal seating in meeting rooms. Also consider the use of screens or partitions to limit 	 space. Reconfigure furniture and/or workstations layout to ensure safe physical distancing, e.g., place floor stance markings, physical barriers, acrylic or glass panels, open doors to avoid touching door handles. 	 Redesign production allow for physical of Consider one-way workplace.
Digital workspace adaptations (including work from home measures)	 Feasibility of Work-From-Home measures should be explored for all employees in a staggered manner 	• Temporary redeployment to a different role that is suitable for working from home to be considered for vulnerable employees within the company	 Ideally suspend all events and explore
Operational and productivity process adaptations	 Travel (Domestic/International) and customer visits to be allowed only for business critical reasons with prior approval of the highest authority Routine issue of visitors/temporary passes should be suspended. If inevitable, visitors should be allowed with screening procedures, with required approvals from the officer who they want to meet Maintain either physical or electronic (using a check-in app) entry and exit register, maintaining accurate data on access to and from the facility, pursuant to local personal data privacy laws. Avoid paper handling or pen sharing. Develop a plan to mitigate employee fears and concerns, and to support general mental health and well-being of employees. e.g. people are worried about their health and the health of those they care about. They have anxieties about their jobs, the future of the organization, and even the future of the industry. Workers to be registered as they enter a work 	 area and records to be maintained by the person controlling the work area Shift-based teams should be granted enough gap threshold between outgoing and incoming schedules. Emergency plan incorporating how to deal with a case of COVID-19 in the workplace and how the changes to business practices may affect existing procedures and other such information to be incldued in the plan. Wherever possible, associates with children below 10 and/or older family members at home, to work from home for a longer period COVID-19 taskforce along with HR should define a maximum density quota of a given office area and map the area by the following: Type of employees: Need to return / total return; Nice to return / partial return; No need / remain as remote workers Define a reduced office operating hours schedule, to enable increased frequency and a more comprehensive cleaning process 	

- ction line/operational activity to al distancing
- ay circulation routes through the

Communication and continuous	Ensure asfety data abast for all abamicals and the inform all visitors that during the initial values
Communication and continuous improvement adaptations	 Ensure safety data sheet for all chemicals and requirements for safe use are available and followed. Designate and signpost the direction of foot-traffic in main circulation paths: corridors, stairs, entries. Ensuring employees understand what the workplace will be like, upon return is critical. Some employees may expect nothing to change, while others will assume everything will be different. Preparing employees and reminding the mitat these changes are designed to help keep them safe will ease anxiety. Provide safe and accurate instructions to all employees and collaborators to ensure personal hygiene as a key element of defense against COVID-19 Questionnaire to be sent to all employees (internal and external) before the re-opening, to be filled and returned. Provide safe and accurate instructions to all employees and collaborators to ensure correct handling of materials/items/equipment and/ or appliances that are frequently used by a large number of people Organize workshop with leaders & HR to communicate remain/return strategy and protocols to follow. Make sure to address personal concerns and needs Clearly identify physical distancing and workplace safe clearance layouts throughout the office with proper signage, markings, stickers, posters, flyers.

Questionnaire to be sent to all employees before the re-opening of offices in order to be filled and returned

THEME

EMPLOYER-LED HEALTH INTERVENTIONS

MEASURE CLASS	MEASURES		
Detection and tracing	 Any officer and staff residing in containment zones should inform the same to a supervisory officer and not attend the office till the restrictions are eased. Such staff should be permitted to work from home and this should not be counted as leave period. When one or few person(s) who share a room/close office space is/are found to be suffering from symptoms suggestive of COVID-19: Place that person in a room or area where they are isolated from others at the workplace. Provide a mask/face cover till such time he/she is examined by a doctor. Immediately notify the nearest medical facility (hospital/clinic) and call the state or district helpline. It's mandatory for all employees to install and use 'Arogya Setu' app launched by the Government 	 procedure can be limited to places/areas visited by the patient in past 48 hrs. There is no need to close the entire office building/halt work in other areas of the office. Work can be resumed after disinfection as per laid down protocol. If there is a larger outbreak, the building/ block will have to be closed for 48 hours after thorough disinfection. All the staff should work from home, till the building/block is adequately disinfected and is declared fit for re-occupation. Workers must report to the company as soon as possible, even if they are working from home: if they are experiencing symptoms of COVID-19 if they have been, or have potentially been, exposed to a person who has been diagnosed with COVID-19 or is suspected to have COVID-19 has not yet been 	 tested), or if they have under undertake, any the undertake, any the persons entering a be registered to as in case of COVID-10. Persons who have potentially been exprequired to follow a not enter or remain. Workers' temperate checks performed This activity will be provided to the her (If the worker has a control of breath, the work isolate immediate).
Personal behavior reinforcement	 Respiratory etiquettes to be strictly followed. This involves strict practice of covering one's mouth and nose while coughing/sneezing with a tissue/ handkerchief/flexed elbow and disposing off used tissues properly. Spitting should be strictly prohibited. Promote practice of employees cleaning and sanitizing their desks, belongings, workspace, and public areas after using them. Use internal promotional programs to encourage healthy habits, cleanliness and other best 	 practices around health and safety Consult the medical staff, report through company Health Check app or alternative reporting channels in case of any symptoms, discomfort, or needs. The employee should also inform their supervisor and/or Human Resources (HR) representative. The foregoing should be carried out if and as permitted by local personal data privacy laws 	

- ndertaken, or are planning to y travel.
- g and exiting a workplace are to assist with tracking of contact D-19 infection
- we been identified as having exposed to the virus are w government advice and must ain at a workplace

The highrisk exposure contacts shall be quarantined for 14 days

ith COVID-19 spreading, especially in some Asian countries, the manufacturing and supply chain ecosystems have started coming back to activity, partially if not completely. As IT vendors contemplate a second wave of the virus spread around the corner, they are gearing up by putting in requisitions for fresh IT assets, such as laptops, dongles, thin clients, and VDI to get their workforce fully ready and prepared in case the crisis deepens.

Organizations are, at the same time, building plans for a safe and sustained way to return to offices, although it may not be 100% back to office in the medium term. Even in the longer term, companies that have witnessed greater success and productivity with a work-from-home policy may choose to retain a much higher percentage of their workforce to work remotely. Going back to the office will depend heavily on how companies anticipate the likelihood of a second wave of the viral infection, its timing and likely severity, and their ability to manage employee safety and productivity in a mixed work environment.

The National Association of Software and Service Companies (NASSCOM), a trade association of the IT and Business Process Outsourcing (BPO) industries in India, has recommended a phased lockdown exit strategy for IT/ITeS and the Business Process Management (BPM) industry.

B ased on our interactions with different IT vendors, many are planning a phased opening approach, although the timelines and the detailed execution plan will vary for different IT vendors. Infosys adopted a Phased Return to Workplace approach in line with NASSCOM recommendations. The company has implemented contact-less thermal scanning, access monitoring, and released awareness videos for employees

PREPARATION Preparing the campus and infrastructure, sanitization readiness, food and essentials management, and regular communication with employees on the modalities to get back to work. Elaborate manuals are being prepared for internal and contract staff.

PHASE 1 Spread across 3-4 weeks, with about 10-20% of the workforce back in offices. Business criticality is being considered the prime most consideration in bringing back a select set of employees – primarily those involved in client-sensitive contracts or in complex functions, such as the creation of blueprints, architectural designs, and others that need high processing power, speed, and bandwidth. Phase 1 is crucial, and because there might be a second wave of the virus spread, companies are cautious in their speed of opening office operations to manage and maintain control.

BEST PRACTICES

PHASE 3 This is the phase when most of the restrictions will be lifted and the number of COVID-19-positive cases will have been drastically reduced. By this time, about 70-80% of all workers will be allowed to return to their respective offices, and normalcy will be restored. Arrangements will still have to be made for the accommodation of people who might have to stay in the office or in a local area to maximize productivity and minimize loss of time. Service providers will have embraced the new normal and will have established standard work-fromhome protocols, as part of regular BAU, to setup a preferred, sustainably blended mode of working in the long-term. Eventually, hybrid workspaces will lead to "work from anywhere".

SE 2 As the situation normalizes, mobility and economic restrictions are relaxed, and the confidence in having executed Phase 1 uneventfully emerges, companies plan to spend the next 4-6 weeks in bringing more employees to resume work from office. Desktops might get replaced with laptops for some of the employees working on crucial projects under tight deadlines in case of a sudden revert to work-fromhome due to any emergency.

WORKPLACE PREPAREDNESS

Maintenance, Hygiene, Sanitation, Employee Communication

Through the COVID-19 induced lockdowns and the process of continued restricted mobility, to the other end of the tunnel with an opportunity to resume normal work and lifestyles, the industry in India, and globally, bets on certain fundamental principles that helped them plan, strategize, communicate, execute, monitor, and revise critical measures in real-time.

The Indian Tech companies took measures to reassure clients regarding service continuity, ongoing support, and even greater flexibility in addressing sudden requirements in this time of crisis. Early communication helped ease stress and get required permissions before the lockdown started. A critical step taken by IT companies was to start communicating with clients early, as the crisis was still unfolding outside of China. As the pandemic spread in India, IT vendors began client communications for special approvals where the workforce was unable to connect from designated delivery centers. In some instances, where the client was operating in a highly regulated environment, early engagement helped them get necessary regulatory approvals for the remote access of data and systems. Barring a few exceptions, IT vendors were able to make clients understand the situation and convinced them on having employees work from home to deliver services. In certain instances, IT vendors went over and beyond to help their global clients institute a work-from-home setup, establish guickfix tech tools to help the clients coordinate across the latter's value chain, trace employees, and ensure outside of contractual work that systems were up and running for these clients. Over-communication and proactive contribution could never hurt, and future business relationships will stand testimony to the rewards of walking an extra step in times of crises.

COMMUNICATE, COMMUNICATE, AND COMMUNICATE

PRIORITIZE WHAT IS CRITICAL

During a crisis, a decision needs to be taken between must have and good to have. IT vendors worked with their clients and identified the must-have services to keep the lights on and channelled their resources toward making sure they are not affected.

COLLABORATE WITH TRANSPARENCY

Both IT vendors and clients realized that they needed to work together closely during the crisis. Several examples came to the fore:

- Clients that were in the essential services segment were able to get passes arranged for IT vendors' employees to reach their facility to manage their mission-critical systems.
- Collaboration platforms were leveraged to communicate with clients in an open and transparent manner.
- Dedicated portals and teams of experts were created rapidly to be available 24x7 to address client concerns.
- Call centers have always been available with the larger Tech companies; even the medium-sized ones were able to quickly set these with teams dedicated to handle a variety of queries, from local management to work-from-home concerns and client issue resolution.
- Webinars and consistent communication series were established by many companies to apprise clients, as well as, many prospects, about the evolving crisis, measures taken to resolve challenges, and progress on projects/overall business.

ENSURE QUALITY OF SERVICE COMMITMENTS ARE UNDERSTOOD WELL AND MET

India's Tech industry had early jitters in the first few days of the lockdown, but they could right-size commitments given the situation. Some companies created daily dashboards to monitor project deliverables and timelines and measure SLAs. There was a drop in SLA in the initial weeks as teams were mobilized, but the dashboard enabled them to take necessary actions whenever the service levels went down. BCP was triggered with a few customers, which helped them focus on only critical projects for a while until all employees were enabled to work from home.

PRIORITIZE DATA SECURITY, PRIVACY AND ACCESS CONTROLS

Multifactor authentication, end-to-end encryption, secure communication channels with access controls for virtual meeting rooms, complex passwords, and email monitoring have been some of the key requirements of clients for which service providers have extended support.

SUPPORT AND EMPATHIZE WITH COST **CONTAINMENTS MEASURES FOR CLIENTS**

Even as delivery in changing work-from-home norms was top priority, the industry also witnessed several instances of contract restructuring and renegotiations. Some observed practices were that:

- Companies received requests for deferred payments, discounts, • and reductions in billing rates, as a way for clients to manage their costs. IT vendors, in most instances, extended a strong support to such requests, and went an extra mile to demonstrate flexibility by not invoking any contract breach grievances or mandating services purchase by the clients.
- Unused service credits and an onsite/offshore services delivery that may have missed key dates because of travel/local regulations were negotiated and managed.

PLAN AND PREPARE FOR **NEWER OPPORTUNITIES**

With cost control becoming the central focus globally, interest in analytics-led focused decision making, investments, and process automation will gain ground. Many global enterprises reached out to their service providers for business enablement through collaboration tools, remote monitoring systems, and security

solutions. Clients that had already been on a digital transformation journey and had invested in digital infrastructure or cloud solutions, such as remote maintenance using Internet of Things (IoT), voiceenabled customer services, and automated processes, were more resilient compared with their less digitized counterparts. Softwareas-a-service applications are being actively evaluated as a costeffective solution to large teams and heavy in-house setups. There is growing focus on building resilient IT operating models, reimagining legacy infrastructure, and initiating digital transformation conversations with service providers. Even the small and mediumsized businesses are actively mulling piloting digital projects, free or at low cost, before making investments.

KNOWLEDGE PARTNER

NASSCOM is the industry association for the IT-BPM sector in India. A not-for-profit organization funded by the industry, its objective is to build a growth led and sustainable technology and business services sector in the country with over 3,000 members.

NASSCOM Insights is the in-house research and analytics arm of NASSCOM generating insights and driving thought leadership for today's business leaders and entrepreneurs to strengthen India's position as a hub for digital technologies and innovation.

Safeguarding measures - overview

The safeguarding measures given here are broadly applicable to working environment in Pharmaceutical and Life Sciences companies.

- Corporate campuses
- Offices in commercial complex
- Manufacturing plants

Labs

Local government rules and decisions should always be followed carefully

THEME WORKFORCE PROTECTION

MEASURE CLASS	MEASURES
Travel / movement to work (including work from home measure)	 In the absence of public transport, provide shuttles or cabs for office employees and plant workers temporarily, until normal transportation is restored
Entry to worksite	 Ensure everyone is tested for body temperature at the main porch, before entering the work premises. Restrict access to the workplace if the temperature is higher than 37.5°C/99.5°F Permit entry to reception area only after hand sanitization/washing
Employee health policy measures	 Create a Biosafety Plan that must include List of job classifications with exposure to infectious pathogens List of infectious pathogens known or reasonably expected to be present in lab materials and applicable biosafety measures Procedures to ensure all incoming materials containing pathogens are treated as virulent, until verified as deactivated or attenuated A risk assessment, performed by the biological safety officer Feasible engineering controls including containment equipment and procedures Required safe work practice controls and prohibited unsafe work practices in accordance with the risk assessment Necessary Personal Protective Equipment (PPE), including respiratory protective equipment. Effective decontamination and disinfection procedures for laboratory surfaces, equipment, and tools. Procedures for communicating hazards to workers and providing required worker training. pathogens procedures to invostigate and provide medical not and with improvement in respiratory surfaces, equipment, and tools. Procedures for communicating hazards to workers and providing required worker training.

certain underlying conditions ase, Respiratory Disease, Disease, Obesity, Pregnancy, ssion etc., may be considered OVID-19 infection. Efforts should commodate employees with these ninimise the infection risk. ss Monitoring Protocol to ack employee status cal insurance for all staff.

All employees and non employees should go through a temperature check at the security gate entrance

THEME

EMPLOYEE PROTECTION

MEASURE CLASS	MEASURES
Personal Protective Equipment	 Provide and ensure that the workers use all necessary PPE, including eye protection and gloves where necessary. Provide disposable gloves to workers who are Screening others for symptoms, or handling commonly touched items. It is mandatory to use masks at all times during office hours in all areas (inside and outside). Masks should be reacted items. A supplementary means that times during office hours in all areas (inside and outside).
Workplace distancing and workstation barriers	 Physically distance every individual by at least 6-feet with measures such as physical partitions (Plexiglas barriers) or visual cues (e.g., floor markings, colored tape, or signs to indicate to where workers and/or employees should stand). In areas where maintaining physical distancing is difficult, frequent thermal screening for workers is advised including temperature, visual, and verbal Checks. Prohibit sharing of desk equipments such as paper, pens, staplers, phone chargers, etc. Avoid movement of physical documents. Usage of electronic documentation is highly recommended Provide markings on ground to ensure social distancing in: lobby or reception area, driver Not more than two zone, especially in
Sanitization measures	 Encourage frequent hand washing and use of hand sanitizer. Frequently sanitize commonly used surfaces & high traffic areas Clean and sanitize shared equipment, touchable surfaces between each use. Employees should be asked to wipe their respective work stations at regular intervals and at the closing of the working hours. Ensure that sanitary facilities stay operational and stocked at all times and ensure workers have necessary cleaning products. Provide time for workers to implement cleaning practices during their shifts. Clean floors using a vacuum with HEPA filter or other methods that do not disperse pathogens into the air. For facilities in laboratory, research, or clinical settings, evaluate existing cleaning and disinfecting protocols and determine additional measures or necessary adjustments to prevent exposure to COVID-19. The plant should be disinfected prior to anyone returning to work In the production areas and workshops, cleaning of tools, workstations, and machine control panels should be initiated with sign off, every 60 minutes Washing of the workshop aisles to be organized at a frequency of every 2 hours A minimum of two times per shift, disinfect toilets and locker rooms (every 2 hours) A minimum of two times per shift, disinfect public

- e reusable, but may be disposable t available.
- y mask, mini hand sanitizer and a ould be carried by all.
- workstation areas, kitchens and all
- ancing to be maintained during s
- wo people should be in the same in the labs.
- alls, corridors, conference rooms, , etc.
- vo times per shift, disinfect
- uch as pedestrians entrances,
- rs, accesses to locker areas,
- ildings
- and disinfection of contact points
- quipments to be avoided, if
- /tools to be wiped before and
- e washed thoroughly before and equipments
- urfaces/tables to be wiped twice a based disinfectant

Encourage frequent hand washing and use of hand sanitizer

THEME EMPLOYEE PROTECTION

MEASURE CLASS	MEASURES
Sanitization measures	 All job sites should implement additional measures of cleaning common areas, bathrooms and toilets to minimise the infection risk Shared work vehicles to be sanitised after each journey (by driver/traveller) by thorough cleansing of touch points
Worksite facility conditions	 Ensure all water systems are safe to use after a prolonged facility shutdown to minimize risk of disease. Mandate that employees eat at different intervals with adequate seat separation to maintain social distancing Stop using vending machines to prevent cross contamination. If not possible, ensure continuous disinfection. Consider upgrades to improve air filtration and ventilation
Public health knowledge and capability building	Recommend activities like Meditation (Mindfulness & Yoga) session, Virtual yoga sessions, Awareness session on mental health, first aid for supporting emotional and mental well being of the employees.

Create awareness on mental health first aid

THEME NON-EMPLOYEE PROTECTION

MEASURE CLASS	MEASURES
Social distancing measures	 All visitors should maintain a 6 foot / 2 meter distance from the receptionist or security guard and must wear masks Restrict visitor entry to reception-area conference rooms. Social distancing guidelines should be maintained
Sanitization measures	 If hosting a meeting with a visitor, the host should ensure sanitization of meeting rooms before and after the use Allow for a minimum of one-hour of time gap between the room usage
Limitations against exposure to individuals	 Visitors must be free of illness symptoms Visitors must not have traveled in the last 14 days before coming to a site Before entering the plant, truck drivers should be identified, checked and measured for body temperature at the security gate entrance. Restrict entry to the site if the body temperature is abnormal (over 37.5°C or 99.5°F). The drivers must wear masks when they alight from their trucks All drivers should answer a health questionnaire – same as other visitors It is forbidden to get off the truck and contact employees on the docks or any other place inside the facility. The movements of drivers inside the plant must be limited to the minimum necessity
Preventions against material contamination	 Employees and visitors should not exchange documents and/or pens Visitors must refrain from carrying any token gift, even if it is within the policy Transport documents should be validated by the driver at the site entrance/exit dedicated area (security gate), according to a procedure agreed with the establishment and any exchange of documents must be avoided as much as possible If the entrance / exit / administrative reception does not have a separation window, set up a dedicated table for retrieving documents with a minimum distance of more than 1 meter. The driver must follow the security guard / receptionist instructions for unloading / reloading.

ce with these instructions (no lic spaces, toilets, coffee areas,

nust not be in direct contact with m distance of more than 1 meter) The drivers must wear their masks when they alight from their trucks

THEME

BUSINESS PROCESS ADAPTATIONS

MEASURE CLASS	MEASURES		
Physical workspace adaptations	 Reconfigure, restrict, or close common areas, like em Work stations without a physical separator should no Reasonably arrange the production plan to maintain separator. 		hade covers where physica
Operational and productivity process adaptations	 Ensure all employees and contract employees complete an electronic return-to-work form prior to returning to any site for the first time after the site's quarantine Deactivate all fingerprint or touch points related to tracking employee attendance or processing payments Stagger employee breaks, in compliance with wage and hour regulations, to maintain physical distancing protocols. Request employees to bring food from home and take meals in their own boxes. Bar ordering of 	 outside food. Non-lab personnel should mandatorily take prior permission from the lab in-charge to enter the lab Boxed lunch to be provided to employees, if eating in the cafetaria Every person before entering the office should fill in a form and give their personal details along with Govt id Ensure doors of all operational staircases and washroom remain open to avoid indirect contact. Or an arrangement may be made to open/close the door by step and pull/push. 	 Provide isolation roo All personal items s shared spaces Maintain staggered or alternate day ros workers in the office or stagger locker us Replace transport lo Define process to ke regular basis to revi any concerns as qui
Communication and continuous improvement adaptations	 Consider the following topics for Worker Training When to seek medical attention. The importance of hand washing. The importance of physical distancing, both at work and off work time. Proper use of cloth face covers, including information in the guidance. Information on paid leave benefits Provide a detailed communication containing Information on the local COVID-19 case situation Why the decision was made that it is safe to return Advise employees of the expected return to work 	 date Information related to the site return to work plan Specific instructions for employees related to changes in protocols Contact information for questions Broadcast information to employees before each phase of return Site leader and HR manager to identify a local contact for questions" Sometimes simple tasks need instructions too - communicate clearly how to wear a mask - the hygiene required while putting on and taking off a mask, the importance of covering the mouth and 	 the nose etc., Inform employees a a confirmed case of while maintaining re All workers should b information for the p Communication is a groups for quick rea Periodic trainings of be ensured by the L Post reminders of signatorial protocols on every of the second second

THEME

EMPLOYER-LED HEALTH MEASURES

MEASURE CLASS	MEASURES
Detection and tracing	 Encourage workers to do a self-assessment and advise them to stay home if they feel sick or dsiplay symptoms of COVID-19 (e.g., temperature of over 37.5°C or 99.5°F)
Personal behavior reinforcement	 Ensure employees wash their hands properly before and after eating Staff in charge for preparing or distributing food must wash hands at least every hour and should be equipped with mask, mob cap, disposable gloves etc., Implement additonal sanitary measures at the work location: hand washing protocols hand sanitiser stations provision of disinfectant wiping products Spitting in and around premises should be strictly prohibited. Defaulters could be referred to the police authorities.

Staff in charge of preparing or distributing meals washes their hands at least every hour and are equipped with mask, mob cap, disposable blouse and gloves

Recommendations: Back to Work

RED ZONE

- Private offices outside certain areas/cities/centres designated by government may function with 33% workforce.
- Use of personal conveyance between 7am to 7pm permitted with limited occupants to travel to functional office within the zone.
- Doctors, hospitals working for medical requirements only, distributors and chemists working but mostly won't meet any pharma professionals. However, activities related to essential pharma supply may be undertaken on need basis.

ORANGE ZONE

- Limited movement allowed in a city / district only and some parts still quarantined.
 No interdistrict travel allowed.
- Only personal conveyance is adivsed.
- Doctors, hospitals are working but with limited visit or none. Stockist, chemist working and available.

GREEN ZONE

- No restrictions of movement by government in and across city/district/state.
- Local conveyance and travel is possible without any significant disruption.
- Doctors, hospitals, stockist and chemists are working and may be accessible by pharma professionals with some conditions of safety.

Recommendations: Back to Work

DOWNLOAD THE AAROGYA SETU APP

Aarogya Setu is a mobile application developed by the Government of India to connect essential health services with the people of India in our combined fight against COVID-19. The App is aimed at proactively reaching out to and informing the app users regarding the risks, best practices and relevant advisories pertaining to the containment of COVID-19. The mobile app helps people identify the risk of contracting the Novel Coronavirus by using the smartphone's Bluetooth and location services.

SOCIAL DISTANCING

- All staff must remain a minimum of 6' apart from each other and any member of the public at all times during the workday
- Do not participate in gatherings (for work or for personal matters) of more than 10 people
- Avoid public transportation
- Avoid long distance travel
- Avoid anyone who may have COVID-19 or may have come in contact with someone who has contracted the virus
- Limit your exposure by minimizing the number of trips to obtain essentials for personal or professional needs (stationery, groceries, etc.)

PERSONAL HYGIENE AND PERSONAL PROTECTIVE EQUIPMENT (PPE)

Everyone is required to practice good hygiene on the job and encouraged to maintain these practices while off duty:

- Frequently wash hands with soapy water for at least 20 seconds especially when preparing food, before eating, after coughing or sneezing, or touching any potentially contaminated surface.
- Cover your nose and mouth with a flexed elbow or paper tissue when coughing or sneezing and disposing immediately of the tissue and performing hand hygiene
- Refrain from touching mouth, face, eyes and nose
- Carry IPA based hand sanitizer and use it frequently. Carry Liquid Soap in your Bag, if possible.
- Use alcohol-based hand sanitizer when soap and water is not available
- Disinfect high traffic, communal surfaces both at work and at home

PERSONAL PROTECTIVE EQUIPMENT (PPE):

Personal Protective Equipment (PPEs) are protective gears designed to safeguard the health of workers by minimizing the exposure to a biological agent. Appropriate use of PPEs like mask, gloves

Local governmental rules and decisions should always be followed carefully

significantly reduces risk of viral transmission. Components of PPE are goggles, face-shield, mask, gloves, coverall/gowns (with or without aprons), head cover and shoe cover.

• The healthcare professionals working in hospitals need to wear all the components of PPEs.

Wear disposable masks as per FFR guidelines. (The N95 filtering facepiece respirator (FFR) is the most commonly used type of respirator, especially in healthcare environments.)

Cleaning staff must wear disposable rubber boots, gloves (heavy duty), and a triple layer mask

N-95 mask, gloves and goggles should be worn by the staff going out in the field to avoid touching eyes and nose PPEs should be regularly inspected, maintained, replaced and discarded, as necessary. Disposable masks are never

to be reused and should be disposed off.

Hands should be washed with soap and water immediately after each piece of PPE is removed, following completion of cleaning. Disposal of used masks: Used mask should be considered as potentially infected medical waste. Discard the mask in a closed bin immediately after use. Remove PPE, discard in a disposable PPE in yellow disposable bag and wash hands with soap and water.

Recommendations: Back to Work

TRAVEL/COMMUTING RECOMMENDATION

General recommendations for personal hygiene, cough etiquette and keeping a distance of at least one metre from persons showing symptoms remain particularly important for all travellers.

- Travelling by cab, flight, bus, train and tram can get you infected. • Use anti-pollution masks and carry a hand sanitizer with you everywhere. Consider travelling by your own vehicle and avoid public transport.
- Avoid long distance travel. •
- Carry any medicines you may need for the duration of your trip
- Pack a sufficient amount of alcohol-based hand sanitizer (at least 60% alcohol) and keep it in a place that is readily available.
- Maintain social distancing by using separate vehicles for travel • instead of pillion ride.
- Avoid frequent stop for public restrooms. If needed, please follow the safety and hygiene guidelines as suggested.
- Encourage employees to gradually return to work by avoiding • peak hours and social interactions where travel restrictions permit
- Outstation travel to be limited and only allowed based on risk • assessment & approval
- Wisely choose the types of travel Air travel, Bus or Train, Car/Personal
- Lodging If you must stay in a hotel or rental property; •
 - Take the same steps you would in other public places for example, avoid close contact with others, wash your hands often, and wear a cloth face covering.

- When you get to your room or rental property, clean and disinfect all high-touch surfaces. This includes tables, doorknobs, light switches, counter tops, handles, desks, phones, remote controls, toilets and sink faucets.
- Wash any plates, cups or silverware (other than pre-wrapped plastic) before using.

Safeguarding measures - overview

The safeguarding measures given here are broadly applicable to working environment in Infrastructure companies

Corporate campuses

- Offices in commercial complex
- Project sites

Local government rules and decisions should always be followed carefully

THEME

WORKFORCE PROTECTION

MEASURE CLASS	MEASURES		
Travel / movement to work (including work from home measure)	 Special transportation facility, working at 30-40% passenger capacity, should be arranged without any dependency on the public transport system 	 for workers coming from outside. Only those employees who have personal 4 wheelers or 2 wheelers to be allowed to come to 	office to avoid putVehicle ACs not to kept open for vent
Entry to worksite	 Workers/ Staff/Visitors shall not be allowed to enter plant premises without a face mask It is advisable to install a disinfecting tunnel at the entrance Vehicle drivers should wait at entry gate only. The area where the drivers are waiting should be sanitized once every two hours. This area should be near to the designated loading points. Workers to be screeened for temperature while coming in to/going out to production from the labour quarters. All vehicles and machinery entering the premise 	 should be disinfected by spray mandatorily Provision for hand wash and sanitizer preferably with touchfree mechanism should be made at all entry and exit points and common areas. Sufficient quantities of all the items should be available All drivers (Company drivers) should sanitize their hands and wear masks in all cases before entering in to their car and office premises At the Reception, thermal screening shall be carried out and a self-declaration form will be kept. Employees are allowed to enter only on completing these formalities. 	 It is advisable to c owners to do disin building for effecti Car owners will pa there will be no va Have floor marking distancing during Turnstile gates not sanitized regularly High touch surface with 1% Sodium H
Employee health policy measures	 Sufficient medical insurance coverage should be provided for the workers Employees coming in from outside the state should stay in home quarantine for 14 days and be allowed to come to office only after they confirm that they are asymptomatic. Employees should go into home isolation if any of their family members has the symptoms of illness (cough, high fever, difficulty in breathing) and will be required to submit the supporting documents to work from home for 14 days. Provide for a designated quarantine hall / isolation room / ward for exigency in the labour colony. If 	 any person is identified with COVID-19 symptoms, they should be Immediately moved to the isolation room and the area where the person was working and all probable moved areas should be disinfected Employees who are at higher risk e.g. older employees, pregnant employees and employees with underlying medical conditions should take extra precaution. Preferably, they should not travel to other location for client or any other visits. 	

oublic transport system to be operated and windows to be entilation.

- o coordinate with the building sinfection treatment of the entire ctive control.
- park their vehicles on their own valet parking
- ing at entry gates for social g thermal screening
- not to be touched with hands and rly
- aces to be disinfected by spraying n Hypochlorite solution

5

All vehicles and machinery entering the premise should be disinfected by spray mandatorily

THEME EMPLOYEE PROTECTION

MEASURE CLASS	MEASURES		
Personal Protective Equipment	 Employees should carry disposable tissues/gloves for covering the fingers/hand while touching a common public surface and ensure that it is thrown only in a covered dust bin after use. Employees should always wear nose mask during visit and meetings and should always carry a pocket hand sanitizer. Security / housekeeping people should use disposable hand gloves only and discard them on a daily basis 	 The Housekeeping staff team should wear appropriate PPEs during sanitization process Security at gate and housekeeping people should use PPE. Store, Admin staff those who are all handling outside documents should use hand gloves. Food items to be served by canteen staff only with proper PPEs. Wearing a face mask is mandatory and shall be 	 removed only while Appropriate face m labourers and to be movement outside General and specia to be as per existin All medical staff ine Medical attendants necessary PPEs, a
Workplace distancing and workstation barriers	 Employees should strictly maintain social distancing of at least 6 feet from each other Employees should carry their own stationeries like pen, note pad/diary etc. and not accept anything from the external offices If an employee needs to stay back in client location, all the COVID prevention measures shall be followed while staying in guest house/hotels e.g. frequent hand washing/ hand sanitizing, maintaining social distance all the time, face covers/ mask all the time while outside and not 	 mingling with other people. Only digital payment/ transactions to be used for hotel bill settlement. Avoid sharing of others phones, work tools, equipment etc., Social distancing to be ensured within the worker's residential halls Maintain a separate isolation room to meet with exigency and to separate the workers with symptoms. There should be total ban on non-essential visitors at sites 	 Handshakes and h In case of mainten distancing cannot duration activities, used to maintain re Office doors to be minimize contact v Contractors' rest re shall also ensure c distancing of 6 fee
Sanitization measures	 There should be an intense deep cleaning of the common areas like staircase, lift lobby, parking area, roof top including the panel rooms and substation etc., Employees should ensure that their hands are sanitized every half an hour and after every contact. Disinfect high touch surfaces like doorknobs, 	 tables, desks, chairs, laptop etc. Do the fumigation of the cartons / material packages received from outside before opening them Provide for regular fumigation at the cooking area, washing area, worker/staff quarter area etc., Maintain the cleanliness at bath and wash area 	 Ensure all vegetab outside are first wa in room. Maintain hygiene a cooking area. Regular disinfectio provided for electr other electric appli

nile eating.

- e masks shall be ensured for all be worn always while at colony, ide and during duty timings.
- cial PPEs for routine work at site sting practice
- including Doctors, Nurses, nts, Sanitation staff to wear all , as applicable

hugs should be totally avoided

- enance work, where social ot be ensured for certain shorter es, face shields and gloves to be n respiratory and hand hygiene.
- be kept open, as far as possible, to t with door handles.
- t rooms, eating places and offices compliance to principles of social eet.

ables, fruits, etc., brought from washed, cleaned and then stored

- e and cleanliness within the mess
- tion procedures should be ctric panels, outlets or any pliances such as computers,

Covering one's mouth and nose while coughing/ sneezing with a tissue/ handkerchief/ flexed elbow

THEME EMPLOYEE PROTECTION

MEASURE CLASS	MEASURES
Sanitization measures	 photocopiers, printers, telephone sets Other objects (e.g. machine switch/buttons, product contact tools etc.) should be wiped with disinfectant regularly. Check & ensure the availability of adequate stock of essential materials, like Sanitizers, HK chemicals, Water bottles etc. Sanitizers should be kept at lift lobbies / main reception / main entrance of office. Hand sanitization should be mandatory for all. Special attention should be given to hygiene of housekeeping staffs, company hired drivers, Ensure social distance at eating area. Maintain different eating timings to avoid group gathering at lunch area. Use of staircase for climbing should be earies to display new capacity on all floor levels near its door. Strictly avoid the movement of labour who are staying within the plant premises to go out of the plant.

ery shift.

- ned and sanitized during office cribed periodicity
- company premises should be and sanitizers shall be kept in the
- es for urinals and wash rooms ed at entrance
- ay to be done at all the areas of rkers leave for work daily.

Employees should bring their own glass/bottle for drinking water and mark them with their name

THEME

BUSINESS PROCESS ADAPTATIONS

MEASURE CLASS	MEASURES		
Physical workspace adaptations	 Deploy the workers and control the movement of workers in order to reduce the worker density concentration 	 Work places shall have a gap of one hour between shifts. Lunch breaks of staff should be staggered to ensure social distancing. 	 Allow employees from alternate days - on the roster
Digital workspace adaptations (including work from home measures)	 Avoid physical meetings and have video conferencing as far as possible 		
Operational and productivity process adaptations	 Ensure the availability of adequate manpower required to run the business / office. Please ensure the medical fitness in advance. Stagger the lunch timings to avoid huge gathering Checking of all common critical amenities like lifts, DG, HVAC, UPS and Hydrant systems and Jockey pumps including filters and chiller water levels and refill the fresh water for proper functionality due to long time shutdown. Include your water 	 dispensers as well. Restore the operation of STP. Due to its low solubility in wastewater it is released into the atmosphere producing an offensive odour. Stop the biometric attendance and consider capturing attendance through RFID card for all employees including contract workers Minimum social distancing shall be ensured in 	 keeping occupants colonies No one should go their own lunch. Make arrangement colony itself, to res Vehicle/s to be kep
Communication and continuous improvement adaptations	 Hospitals/ clinics in the nearby areas, which are authorized to treat COVID -19 patients, should be identified and list should be available at work place all the times Communicate with respective regulatory bodies for permission to resume normal working Communicate with internal and external stakeholders detailing the terms of resumed operations Daily Tool Box meeting shall contain the awareness about COVID-19 and measures to prevent its spread, while maintaining social 	 distancing Display awareness posters (Dos and Don'ts) at prominent places, including colony premises in all languages spoken by the workers. 	

s from each department to work /s - departmental head to decide

ints in a single room, in labour

go out for lunch. All must bring

ents to supply all essential items to restrict movement of labourers. kept ready for emergency purpose Stopping the Biometric attendance and note the timings through manual attendance register

EMPLOYER-LED HEALTH INTERVENTIONS

MEASURE CLASS	MEASURES
Detection and tracing	 Get employees checked for any symptoms with the help of local NGOs like Asha workers If any employee is found to have cold, cough, fever and/or high temperature, they should be sent back home and advised to take medical advice Ensure that all the workers coming to work
Personal behavior reinforcement	 Employees and workers must be trained on respiratory etiquette. For example, covering one's mouth and nose while coughing/sneezing with a tissue/handkerchief/flexed elbow Employees should bring their own glass/bottle for drinking water and mark them with their name A total ban on gutka, tobacco, etc. and spitting Employees and workers should be encouraged to go cashless and use payment apps such as BHIM, Google Pay etc., Employees should avoid touching eyes, nose and mouth immediately after using the sanitizer

health monitoring of the canteen commencement of operation. aintained in canteen.

ust download the Aarogya Setu oid mobiles

Awareness posters need to be displayed

Safeguarding measures - overview

The safeguarding measures given here are broadly applicable to the working environment in Business Services and Consulting companies.

- Corporate campuses
- Standalone offices
- Offices in a commercial complex

Local government rules and decisions should always be followed carefully

THEME

WORKFORCE PROTECTION

MEASURE CLASS	MEASURES		
Travel / movement to work (including from home measures)	 It is recommended that employees do not use public transport. If commuting by walk, crowded areas should be avoided and social distancing maintained. The following commute policy is advised. ~ Four-wheeler: 2 passengers per sedan and 3 per 	 SUV (including the driver) Two-wheeler: Travel solo. No pillion rider allowed. Sanitization wipes to clean the vehicle before and after use Reusable cloth mask / 3-ply surgical mask 	should be worn ~ Windows to be other passenger ~ An alcohol base exiting and ente
Entry to worksite	 All employees and visitors shall be thermal scanned for temperature. People with a temperature of above 99.5° shall not be allowed entry into the workplace. Thermal scanning shall be done during exit from the workplace as well 	 and any person displaying symptoms of flu shall not be allowed entry into the company shuttle. Visitor entry to be barred if possible. If visitor entry is important, it is advisable that they are restricted to the lobby areas only. Permission for visitor entry 	 shall be granted of Wearing a mask s gain access to the not wearing mask
Employee health policy measures	 If any employee or their family member is quarantined, the employee is encouraged to work from home If anyone reports sick, they should be distanced from others and kept in a specific Isolation room People above 65 years of age and those with comorbidities and parents of children below the age of 5 may be encouraged to work from home Medical insurance of the employees to be made mandatory Employees shall be advised not to leave home if they feel flu like symptoms, such as cold, fever, cough and in such a case, put themselves in self-quarantine Drugs such as Hydroxychloroquine are to be made available only based on physician prescription Work-from-home shall be granted to pregnant 	 women and those who have pre-existing respiratory illness or heart disease Employees in at-risk groups or managing with children at home and without access to schools or childcare may be provided the flexibility they need Any staff requesting home quarantine based on the containment zone activities in their residential areas should be permitted to work from home Employees should be encouraged to install Aarogya Setu app as per the directive of the Govt. of India Employees from the defined containment areas in RED zones should inform their managers and NOT report to work . Employees with flu-like symptoms are advised to self-quarantine themselves for 14-days from the last exposure and should continue to monitor for symptoms. 	

- rn at all times while commuting
- e kept open while commuting with gers
- sed sanitizer should be used while ntering any vehicle
- I only by section heads.
- should be made mandatory to the building at all times. Employees sks should not be given entry.

All employees and visitors shall be thermal scanned for temperature

THEME

EMPLOYEE PROTECTION

MEASURE CLASS	MEASURES		
Personal Protective Equipment	 Everyone shall wear a protective mask in public Everyone should wear a protective mask if public transport is opted, or if travelling in a car-pool or in public places Ensure food preparers and handlers are wearing 	 all necessary PPEs without any compromise. Appropriate PPEs (Nose mask, gloves, goggles) should be used when carrying out cleaning works and handling waste and PPEs should never be shared. 	 Provide employees guidance to wear it Use of face covers,
Workplace distancing and workstation barriers	 A clear distance of 6 feet between two individuals shall be maintained at any point in time Gathering of people in common areas, such as corridor, entry gate, reception, cafeteria shall be 	 prohibited. No group discussion shall be allowed for more than 5 people. In any gathering, distance of 6 feet is mandatory. 	 Meeting rooms sho partitions and socia Limit the number or elevator at the same
Sanitization measures	 Cleaning of the facilities shall be done depending upon the level of dirt accumulated by brooming, vacuuming, cleaning with soap and water etc. Sanitization shall be done with low concentration anti- microbial agents in order to reduce germs to a safe level Hand wash facility with soap, sanitizer preferably with touch free mechanism shall be made available at all entry, exit and common places. The same shall be refilled at frequent intervals. The COVID taskforce team shall ensure regular supply of soap and/or hand sanitizer (with at least 60% alcohol). 	 Everyone has to sanitize their hands before entering the reception. A sanitizer bottle shall be provided at the reception. Everyone is advised to carry a portable sanitizer bottle for frequent hand hygiene Employees should sanitize their hands after getting down from bus, car or their own vehicle. Everyone should be asked to disinfect their desk, keyboard, chair handle, drawer, every 4 hours or as frequently as possible or if there is a potential of droplet dispersion due to cough or sneeze Consider having adequate alcohol-based hand sanitizers in rest rooms to encourage hand 	 hygiene among bui Hand sanitizers sha Water dispensers / cleaned and sanitiz Dispensing handles or people should be wipe down touch p Public areas (not ju as shuttle buses, ef also all the places be conditioner filters, l etc.) should be disi
Worksite facility conditions	 Employees should avoid pressing the lift buttons by hand and use disposable tissues instead 		

ees with 2 masks daily with r it at all times

ers/masks to be mandatory

hould be equipped with flexi glass ocial distancing markers

r of people getting into the ame time to avoid crowding

building occupants

- shall be kept in lift always
- s / Pantry machines shall be itized frequently

lles shall be disinfected hourly be provided sanitizing wipes to points after each use

Ensuring Mental Wellness with Getting Back to work Safely

Impact of Pandemic on Mental Wellness

Mental wellness is the state of emotional and psychological well-being in which an individual is able to use his or her cognitive, behavioural, social and emotional capabilities, to function in family, society and organisation adequately and meet the expected demands of everyday life.

MENTAL HEALTH SPECTRUM

MENTAL HEALTH STATES

EMOTIONAL

450NAL

Feeling Sad, Anxious, Worried, Tensed, Angry, Irritated, Frustrated.

PHYSICAL

Increased Heart Rate, Sweating, Feeling Tired & Fatigued, Headache, Pains, Stomach Problems

BEHAVIOURAL

Avoiding social interactions even virtually, Alcohol, Smoking, Procrastinations.

COGNITIVE

Thoughts that include: Not being good enough, Circumstances being like this always, Not being able to control situations.

This is a time of uncertainty, unpredictability and ambiguity. All of us are confused and worried about the situation out there. Most of us are going through a phase where we do not know what to do. Our coping strategies seem to be inadequate and this leads to impairment in different areas of our life

> Tendencies to vent their frustrations on family members. Increase in relationship issues and domestic violence due to minor triggers.

Social disengagement. Isolating both physically and emotionally from friends and colleagues.

Low productivity and job satisfaction. Reduced interactions and emotional distancing from work and colleagues due to the changed nature of work and safety guidelines.

Management Strategies

Employers need to adopt a holistic management strategy to ensure mental wellness of employees returning to work. Depending on the level of functional impairment of each individual, self-care, peer-support and professional-care interventions would be effective.

LOW

Functional impairment

Periodic low productivity levels & Social interactions; Occasional mood swings

NO

Functional impairment

Consistent performance; Proactive peer support & social engagement

Approach for ensuring Emotional Wellness

with "Safely back to work"

It's very important to ensure emotional wellness of employees while getting back to work. The approach can be broadly divided into 4 parts:

SITUATION **ANALYSIS**

would largely depend on the industry and the nature of work. For example, IT/ITES might see a disproportionately large first category whereas the manufacturing sector cannot function without the physical presence of employees. Even within the same company, there might be verticals/ departments which would have very different requirements. For instance, the product and technical teams can still manage to work from home, whereas the operational functions might resume

Employee Pulse Check 2

Organisation Related

- Stigma
- Psychological Safety Climate

Personal/ **Home Related**

- Work/Life Balance
- Major Life Events

working from office earlier than others.

Even the employees who start working from the office are going to experience a "New way of working". Safety norms like staggered shifts, scattered workstations, absence of the typical watercooler conversations, etc. would result in a very heavy emotional toll on the employees. Hence, it's important to analyse the situation and accordingly create custom intervention strategies for ensuring emotional wellness of employees.

It's important to identify and acknowledge the risk and protective factors both at the professional and personal levels to create a holistic intervention strategy.

Approach for ensuring Emotional Wellness

with "Safely back to work"

INTERVENTION STRATEGIES

nce we have identified the risk and protective factors, it's important to reduce the risk and promote the protective factors.

EXAMPLE OF REDUCING RISK FACTOR:

A better job control with more flexible hours and a choice to work from home (depending on the nature of work) can result in improved job satisfaction among employees.

PROMOTING PROTECTIVE FACTORS:

This is an important part of intervention strategy as risk factors might not provide a lot of flexibility to change.

INTERVENTION STRATEGIES

- Flexible Work Hours
- Strict Safety Guidelines
- Transparent + Over-communication

- **2** Promote Protective Factors
- A) Building Individual Resilience
- B) Peer-support & Team Culture
- C) Psychological Safety Climate

Indi Lev

Tea Lev

Org Lev

PROMOTING PROTECTIVE FACTORS

ividual el	 MOTIVE: Building Individual Resilience Introduce Stress Management/ Resilience Training Facilitate Physical Activity Programs Encourage E-Course/Self Help/Wellness Programs
m el	 MOTIVE: Building Peer Support & Caring Team Culture Introduce Team Norms Facilitate Manager Trainings on Psychological First Aid Designate Rotational Team Wellness Champions Create "Resource Enhancing" Support Groups
anisational el	 MOTIVE: Create Open & Positive Psychological Safety Climate Facilitate Realistic & Frequent Communication Encourage Sick Leave for Mental Health Issues Design & Implement Mental Health Policy for Organisation

Approach for ensuring Emotional Wellness

with "Safely back to work"

EXECUTION AND **IMPROVING ADOPTION**

- Increase Awareness & Reduce Stigma
- Facilitate Early Help Seeking
- Consistent Communication
- Agenda of Peers & Managers
- Modeling from Senior Management

EXECUTION **AND IMPROVING ADOPTION**

ne of the biggest challenges facing employee wellness resources in organisations is its under utilisation. With ASSOCHAM report suggesting 42.5% employees who are going through depression or anxiety, a typical EAP solution only garners 1%-3% engagement. The reasons go beyond the cultural stigma and manifest in the importance given to this by the organisation.

Organisations need to follow a 5 pronged approach to increase the adoption level of intervention strategies designed for getting back to work safely.

()4

Increase Awareness and Reduce Stigma	Facilitate Informative Webinars & Sessions Organise mental health first aid trainings Supportive language across levels (CXOs to ground staff) Build dedicated relaxation chambers
Facilitate Early Help-Seeking	Build internal peer support groups and manager trainings Organise regular well-being checks and health screening Enabling accessibility (24x7) and ease of use of counselling services through third-party providers (EAP services)
Consistent Communication not just one time	Regular communication (weekly/fortnightly) Create channels to facilitate regular discussions like Motivation Monday
Agenda of Peers & Managers <i>not just HR</i>	Define role of peer supports Enable trainings and accreditation programs Introduce this into team/manager KRAs Deploy barometers for measuring team satisfaction levels
Modeling from Senior Management	Make wellness an agenda for senior management Senior management to walk the talk Introduce open forums for sharing feedback

ove framework can help increase adoption of wellness interventions at a broader There are a few sector specific best practices whose implementation is important stance, sectors employing blue collar workers must focus a lot on in-person ce of professional counselors along with native language support. Similarly, IT/ quire a lot more focus on consistent communication and modeling by senior ement as a majority workforce would continue to work remotely. Remote working has its own challenges with respect to identifying the need and encouraging adoption.

REVIEW

OUTCOMES

Approach for ensuring Emotional Wellness

REVIEW AND CONTINUOUS IMPROVEMENT

all strategy for emotional wellness. Periodic "Employee Pulse Check" and "Team Happiness Barometers" can help organisations identify the effectiveness of the strategy. A continuous improvement is important to build an effective solution for longterm Mental Wellness.

here is no one-size-fits-

Constant Pulse Check on Employees

WHERE TO GET STARTED?

Depending on the current wellness interventions, it's important for organisations to analyse the gaps caused by the pandemic, and act accordingly. The following checklist could help as a starting point to understand the area(s) which might require rethinking.

HR policies on mental health in relation with COVID-19 are available in our organisation. We have a well designed mental protocol to prevent adversities

- related to mental health.
- pandemic.

This is a self-reflection checklist "for" the purpose of "evaluating" your preparedness related to mental health challenges connected to this pandemic.

EMOTIONAL WELLNESS PARTNER

YourDOST is an emotional wellness platform where you can anonymously, 24x7, seek support from 900+ experts (professional psychologists, life coaches and career coaches) on issues related to relationships, work, anxiety, depression, grief, self-improvement and many more. In the past 5 years they have counselled more than 20 lakh individuals and have collaborated with 100+ corporates in building resilient organisations and happier communities. The company/ founders have received accolades like Redherring Top 100 Asia Winner, Forbes 30 under 30 Asia, Digital India startup award for social innovation by Times Group and Your DOST Govt of India.

CHECKLIST FOR ORGANISATIONS TO EVALUATE THE READINESS OF CURRENT MENTAL WELLNESS INTERVENTIONS

Our senior management prioritizes, focuses and communicates on mental wellness frequently. We encourage open discussions on mental health.

We have EAP support for our employee to access counselling services confidentially.

We have provision for 24x7, multilingual, multichannel counseling access for all levels.

We have periodic mental health seminars/workshops for our employees.

Our managers dedicate time for one on one meetings with employees for discussing issues

Our team is aware of common mental health symptoms which can manifest during this

We have prepared and circulated mental health awareness material to the team.

Our teams are mandated to acquire points by attending programmes related to mental health. We have implemented self help groups.

Our employees can take leave citing mental health reasons.

We have the option of work from home for our employees if required.

We have deployed mental health professionals in campus for face to face consultations. We have dedicated relaxation space in our orgaisation.

HELP INDIA GET BACK TO WORK SAFELY

Best Practices Handbook

HIGHLIGHTS OF MEASURES BY HIERARCHY OF CONTROLS

CONTEXT & OBJECTIVES

SAFELY BACK TO WORK

INDUSTRY EXAMPLES OF PRACTICE

EXAMPLES OF SAFE & NEXT WORK SOLUTIONS

Personal Protective Equipment (PPEs)

Provide plexiglas screens where employees need to face visitors or customers or fellow employees [e.g., service counters, canteens, workstations]

Keep sufficient stock of hand sanitizers and make them easily available in all sections of the work areas

Create instruction manuals for the employees on rules for wearing a mask handwashing technique • safety measures while commuting or travelling

The Corona protocol updates should be communicated to every employee through regular newsletters, reinforced by posters, banners and flyers at entrance lobbies

Administrative Controls

Put together a task force to manage testing and contact tracing protocols if any

employee shows signs of infection

Put together a protocol to clean all high touch points [e.g., taps, washroom facilities, toilet flush and seats, hand rails on stairs, door handles/ push plates, lift buttons, workstations, keyboards, printers, office equipment,

controls etc.) every hour

machinery and equipment

Implement rotation shifts to reduce crowding in common

areas and to ease pressure on public transport

> Efforts should be made to accommodate employees with certain underlying conditions like Heart Disease, Respiratory Disease, Diabetes, Liver Disease, Obesity, Pregnancy, Immunosuppression etc., to minimise the infection risk. For example, a few companies have given them mandatory work from home options.

Provide clear instructions on physical distancing in work areas and other facilities such as elevators, cafeteria, lobby etc.,

All employees should go through temperature screening and sanitization tunnels (where available) before entering the worksite

Perform random checks in all departments on full list of measures to make sure protocols are put into practice

Engineering Controls

Instead of briefing employee on safety face-to-face, provide the safety instructions digitally.

Reduce line speed so that less people are needed to run the production line to facilitate the 2-meter distancing rule.

Provide markings on ground to identify distance and walking paths in: lobby or reception area, driver reception areas, workstations areas, cafeterias, kitchens and all common areas.

Close down all non-essential machines such as vending machines.

No sharing of tools and equipment should be allowed until they are sanitized between uses.

Reduce the number of chairs in meeting or break rooms/ areas by 50 percent to ensure physical distancing.

Consider upgrades to improve air filtration and ventilation.

Substitution

Bar physical meetings as much as possible – conduct all meetings online

Local governmental rules and decisions should always be followed carefully

Disseminate rules for work from home

Elimination

Workers should be encouraged to do a self-assessment and advised to stay home if they feel sick or display symptoms of COVID-19

Non-essential physical work that requires close contact between employees should not be carried out

Local governmental rules and decisions should always be followed carefully

Employees have to arrive in work clothes and cannot change on site

ACKNOWLEDGEMENT

India

The alliance to "Help India Get Back To Work Safely" was formed by the Indian operations of four global HR services companies viz., Randstad, The Adecco Group, ManpowerGroup and Gi Group, with the objective of to minimize the negative impact of COVID-19 on the economy. The alliance's focus has resulted in the 'Safely' Back To Work' – Best Practices Handbook, a collection of health and safety protocols that companies around the country can use to get their operations going safely.

Returning to the workplace and reshaping a new future of work is key to ensuring the health and wellbeing of workers and a strong economic recovery. The "Safely Back to Work" Alliance initiated by Randstad, The Adecco Group and ManpowerGroup in March 2020 has successfully expanded its reach and network of participating partners and is now being led by our global industry association, the World Employment Confederation (WEC). As leader of this Alliance, WEC will continue to engage country federations, and private sector members, working closely with their local authorities and other relevant stakeholders, to support a safe return to work for workers and organizations globally, reinforcing the critical role of the private employment services sector in driving healthy resilient labor markets and economic recovery for countries, organizations and individuals alike in a post-Covid 19 environment. For more information or to join the growing Alliance, visit wecglobal.org for more information.
